

Dear Clients, Friends, and Colleagues:

With 2016 on its way out and 2017 right around the corner, we'd like to take this opportunity to thank you for your continued support over the past 25 years, and to inform you of some changes that are coming.

Renovations are well underway for our laboratory expansion which will add an additional ~8,000 square feet of analytical testing and support space to our current facilities. These renovations are expected to be completed this coming March.

We are excited to announce that our Aquatic Toxicology department has considerably expanded its testing capabilities and has successfully obtained new ELAP certifications in over 10 Acute & Chronic toxicity bioassay methods for both freshwater and marine species.

Our QA/QC department has added two highly valued employees, Theresa Johnson as QA/QC Director and Robert Schadt as Senior QC Officer. They have been instrumental in driving our laboratory to an even higher state of analytical quality and compliance.

MAI proudly offers some of the most diverse testing capabilities of any lab in Northern California. Our number one goal is to provide you with high quality, on-time, defensible data at a competitive price. We will be making a few adjustments to our pricing structure in the new year. Please contact our Marketing or Project Management staff regarding these changes.

We hope that we have been successful in providing you with excellent customer service & analytical support. Your satisfaction is important to us and feedback is highly valued and encouraged.

Thank you again for your continued loyalty to MAI. We are looking forward to working with you in 2017.

Best Wishes & Happy New Year to all!

*From the McC Campbell Analytical, Inc. Team*
