

Microbiological Testing

What's New

- We have new 2014 COCs available on our website. Please note that the turnaround time now reflects days instead of hours. Feel free to contact us if you have any questions.
- Formaldehyde by LCMS E1694 NOW AVAILABLE!
- Perchlorate by LCMS E6850 NOW AVAILABLE!

MAI offers a variety of non-routine microbiological analyses that you may not be aware of including the following:

- Bacillus
- Enterococci
- Fecal Streptococcus
- Fungus, Yeast & Mold
- Iron Sulfur Bacteria
- TC & EC (various methods)
- Sulfate Reducing Bacteria
- Legionella
- Pseudomonas Aeruginosa
- Salmonella
- Staphylococcus Aureus
- HPC (SIM & Pour Plate)

Our microbiologist is highly skilled and has over 35 years of experience in the field. If there are any particular methods that you are interested in that are not listed above, please inquire about method set-up.

Important to Note:

Most non-routine microbiological analyses have a greater than one day incubation period; therefore, one day rush TATs may not be possible. Please contact us for rush TAT availability.
